

Lappset Fono

Interactive DJ Booth

Fono is the world's first outdoor DJ booth where you can play your own music by placing your phone on sound-amplifying pads. Fono offers an interactive experience where you can DJ or dance with friends, catering to young music lovers. It plays the latest hits directly from your smartphone, allowing aspiring DJs to mix and edit like pros. With classic sound effects for added flair, Fono ensures anyone can showcase their musical identity.

1. Versatile Mixing Features

The Fono has two sound amplifying pads where you can place your cell phone, providing users with the ability to mix multiple songs together and create a personalized experience. It provides innovative mixing options, such as Filter (alternately filtering out high and low tones), Loop (recording and repeating 10 seconds of music), Scratch (creating a scratching sound by moving the discs back and forth), Delay (creating a repeat with a small delay), and Crossfader (letting two songs overflow into each other).

2. Social Gathering Spot

The Fono serves as a positive gathering spot for young people seeking socialization. It offers a space for chatting, hanging out, exercising, and expressing creativity. By engaging in activities they are passionate about, they not only nurture their talents but also connect with others who share similar interests. This blend of creativity and social interaction makes The Fono a vibrant hub for personal growth and collaborative inspiration.

3. Developed for the outdoor area

Our interactive playground equipment is designed with one main goal: to give our customers peace of mind. We frequently receive questions about our products' durability against vandalism, the maintenance they need, and their suitability for harsh weather conditions. We've carefully crafted our products to exceed your expectations.

Examples of sound packs

Dance #1

This collection of samples is made with various electronic instruments. This music is often heard in clubs and big parties.

Future House #1

This collection of samples includes various future house samples, a subgenre of house music.

Hip Hop #1

This collection of samples includes hip hop from the 1980s, 1990s, and early 2000s.

Rock #1

This collection of samples is inspired by rock music with guitar and bass influences.

Fono creates interaction

Fono is a pioneering playset designed to foster interaction and movement, offering advanced ways to enjoy music.

This interactive DJ booth lets users seamlessly transfer music from their smartphones to the platform, enabling them to mix and edit tracks like professional DJs. Playgrounds often lose their appeal to tweens and teenagers, who find them childish and uncool.

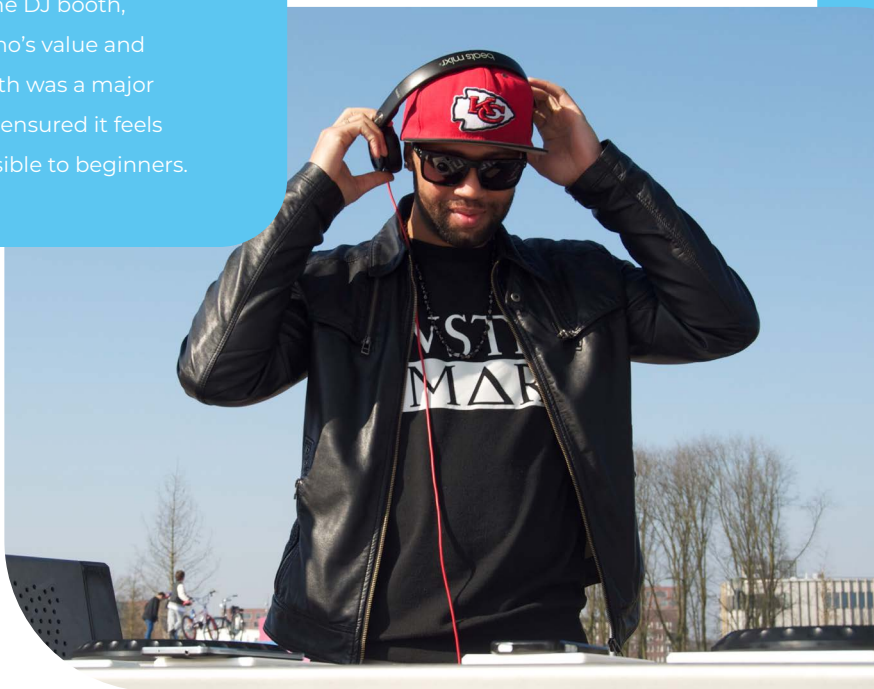

Teens, often misunderstood, need a space where they can explore their identities, express their opinions, and enjoy their favorite music. Fono addresses this need by providing a safe, engaging environment where they can hang out, dance, and socialize, transforming public areas into vibrant hubs of youthful creativity and connection.

Did you know that

We collaborated with professional DJs to design the DJ booth, leveraging their expertise to enhance both the Fono's value and user experience. Creating the first outdoor DJ booth was a major achievement, and by focusing on key features, we ensured it feels authentic for professionals while remaining accessible to beginners.

Lappset Dashboard for more fun

Our online tool gives you complete control over your playground equipment. Our dedicated design team constantly crafts new sound packs, ensuring a fresh experience. Surprise users daily with rotating sound packs, offering a new pack every day. When you invest in our product, you're not just buying hardware; you also get software, sound packs, stats, and free online updates.
