

Lappset Luna

Interactive dance and play spot

The Luna is an inclusive playset that brings excitement to any indoor space. Luna is an interactive playset that dynamically responds to the players in it. It detects players' movements and reacts with sound and music. Children are encouraged to dance, play, and collaborate in various games. Each time you enter the field, you'll discover new games and challenges to explore together.

1. Luna Offers Inclusive Play for All Ages

The Luna playset is designed to be inclusive for all ages and abilities, with a barrier-free entrance for easy access. From toddlers to seniors, the Sona allows for multigenerational play and offers a variety of games to cater to different player preferences and playstyles. Our online platform allows for easy access to games, ensuring that the Luna can be tailored to meet the needs of all users at any given time.

2. Unique Interaction Method

Luna doesn't project images on the floor like projector-based systems. Instead, it relies on voice commands, creating a face-to-face interaction and an immersive gaming experience. It also means that you can place it anywhere you like without needing a dark area, although it's still possible to do so.

3. Developed for indoor areas

Luna transforms any space into an engaging environment, regardless of lighting conditions. It offers inclusive play with no barriers, allowing anyone to effortlessly join the game, while keeping the play area clear for easy maintenance or flexible use. Luna's advanced sensor technology ensures endless fun for large groups of players in just a few square meters, making it perfect for any indoor location.

Examples of games

Color

The Luna calls out a color. Look at the ground and stand on the color. If you manage to stand on the color several times within the time limit, you will go to the next level.

Reaction Race

Race to the numbers and beat the highest score of the day.

Commando

Listen to the arch and do what the arch says. Stand on a color, number, or shape. Work together or alone. When you are successful, you'll level up.

Freeze

Dance to the music. Stop dancing when the music stops. A friendly shout-out will be given to the last person who stops, and then we'll keep playing together!

Luna creates interaction

The Luna is the younger sibling of Lappset Sona, serving as an interactive box that houses advanced sensor technology and is accompanied by a Luna Play Floor. These sensors and the Play Floor are fundamental to understanding the Luna as they form the basis of the game experience! Picture yourself strolling through a shopping mall and encountering a design on the floor with a prominent star at its centre. As you approach the star, a voice calls out, inviting you to partake in a game. This marks the commencement of your interactive journey with the Luna!

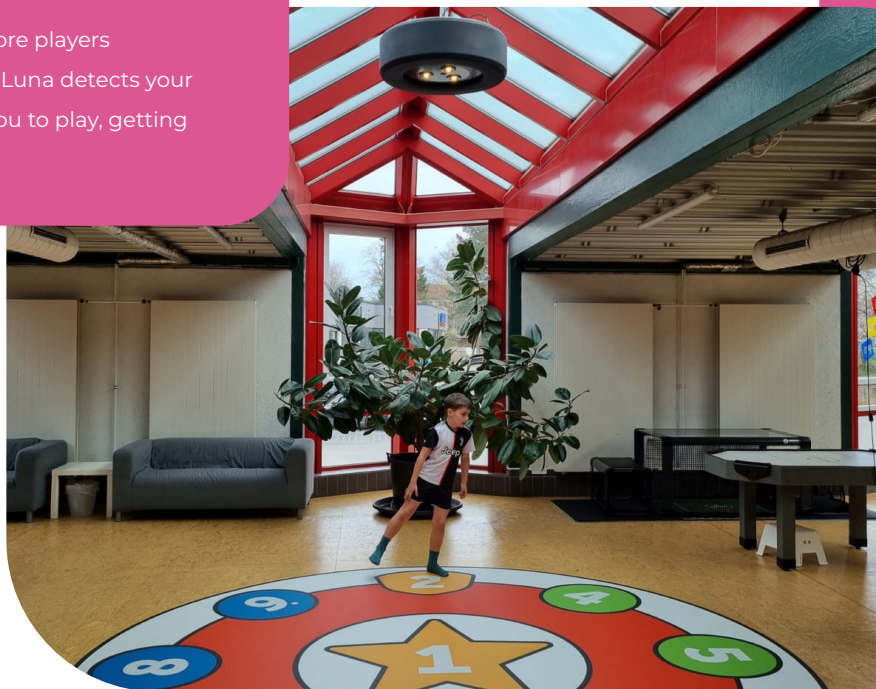

The Luna utilizes sensor technology from above to detect players. Simply step into the play area, and the Luna automatically starts a game. Providing an engaging play experience.

Did you know that

Luna is ideal for group play, supporting ten or more players simultaneously. Once you step into the field, the Luna detects your presence and automatically selects a game for you to play, getting everyone involved and active.

Lappset Dashboard for more fun

Our online tool gives you complete control over your playground equipment. Our dedicated design team constantly crafts new games, ensuring a fresh experience. Surprise users daily with rotating games, offering a new game every day. When you invest in our product, you're not just buying hardware; you also get software, games, stats, and free online updates.
